y Things to do this week — December 8, 2012
Send out email notifications for organizations you follow - Joanna
Twitter/FB sharing/Generic share - Joanna
Bring back stuff from Ben - Joanna
Mockups -> Actual code - Cristina
Change image size from filepicker -> Cristina
Overflow progress bar -> Cristina
Notifications - Cristina
Look over documentation again (remember to pick good design issues to talk about/discuss;
send a copy to Katie/Dalton if we want comments) - send by Monday morning and we'll get it
back by class - get it done by Sunday at 10
Write test cases!!!
       -good edge cases especially for controller functions
       -expect tests for each operation in problem analysis
       -a few model test cases would be good
       -write 50 test cases or so

Priorities:
-Do tests first
-If time, do notifications

If you do live updating, talk about what you're doing. Mention in design analysis and know you
know it's not perfect.

Demo = 5-7 minutes
If you wanted to sell the product, what would you do?

Deadlines:
Code today
Documentation by 10 p.m. tomorrow
